

MIDDLE SCHOOL STUDENT DENOUNCES THAT STUDENTS ARE GETTING ILL DUE TO AIRPLANES SPRAYING “CHEMTRAILS” OVER THE CITY OF ENSENADA, BAJA CALIFORNIA MÉXICO.

TEN STUDENTS HAVE PRESENTED NAUSEA, HEAD ACHES, THROWING UP AND HAVING FAINTED.

CR- December 03 2010.- For years we have seen in the main cities of the world, in medium-sized cities, in small towns, that airplanes fly over these inhabited areas leaving a white trail in the sky that does not dissipate in a normal or natural such as the case with commercial airliners. A commercial airliner, while it crosses the sky, leaving a water-vapor trail due to the freezing temperatures at the altitude where it flies does leave a trail. These water condensation trails are called *Contrails*. They dissipate and totally disappear. In a different form, there exists a phenomenon that has been noticed in the skies of the world called **Chemtrail** –(*Khém-trail*).

Chemtrails are a deadly cocktail of chemicals, heavy metals such as Barium (Ba), Aluminum (Al) in colloidal form, that is, in small spores that can be absorbed by the body through the respiratory system. Moreover, according to air quality studies in many of the affected areas within the United States and Canada have revealed that these airplanes are intentionally spraying population areas with biological infectious agents in the form of dried human cells such as Lupus, Hepatitis B, Tuberculosis (TB) and Influenza and when these spores come in contact with the inner-humidity of the human body, they are activated as well as other pathogens or agents infecting the host.

Estefanía is a happy, intelligent and energetic 14 year-old young lady. She studies in a public middle school in Ensenada, Baja California México; a port located on the Pacific Ocean 68 miles to the south of the San Diego-Tijuana border. In an exclusive interview to Conciencia Radio (CR®) , Estefanía has informed us that students as well as teachers at the school that she attends have noticed that during the weekly flag honors- an equivalent to the Pledge of Allegiance in the US- more than 10 students have suddenly gotten sick at the exact same time when non commercial airplanes have been spraying the city. In order to protect her identity and her family's, we have omitted the name of the school in question as well as her last name.

Estefanía mentions, in an alarming way, that this matter has not been checked by neither the food and safety, environmental nor the health authorities.--“I have seen many children that during the ceremony, when we do the honors to the flag, some airplanes start spraying a kind of ‘thing’, I don’t know. I don’t know if ‘it’ is related to this, but it is very curious that when this happens, the children start to throw up, they feel nauseous, they faint. After classes, it’s like it’s not the same attitude as before, like if they lack concentration and many of which have to ask their parents to pick them up.”

These are signs of fatigue or tiredness which are commonly associated to *chemtrails*.

When asked about the coincidence on the noticeable effects upon the students' health at the school and that this is happening exactly when these non-civilian airplanes are spraying, she confirmed something very troubling. –“It's too much a coincidence that exactly before this started happening to the students nothing was happening to them. But since this started happening, the students started acting this way,” she remarked.

When we asked her since when this started happening, she informed us that a Civics and Ethics teacher has told them that this has been happening since more or less 5 or 6 years. That is to say, since the year 2004 or 2005 these maladies have been occurring within the student body. “It happened before but not as frequent,” she said.

Chemtrails, is a compound word in English that derives from the words *chemical* and *trail* creating different symptoms such as recurrent colds, sporadic diarrhea, headaches, nausea, vomiting, fatigue, bronchitis, respiratory infections of all types, migraine, pneumonia, non-fever influenza, general weakness, asthma, sinusitis, apathy, tiredness even mood changes. These effects have been reported among the population when the aircraft are spraying the skies.

What is happening at this school may confirm just that. “Suddenly, we're in the ceremony without any strange weather or anything, although I haven't gotten sick to the degree of vomiting, but I do get like a cold and get nauseous. But I haven't gotten to the point of throwing up. But I do have many friends that have gotten to the point of throwing up,” said Estefania.

What we are seeing in our skies is a silent biological attack against the civilian population of Ensenada Mexico with the use of military planes of both NATO, the UN Army; Canadian and American even civilian aircraft. Also, when the former Secretary of Defense, Donald Rumsfeld, was asked in 2002 about what *he* would do if and when another attack happened on American soil, similar or worse than that of September 11, 2001, he answered, “We don't worry; we already have Prozac in aerosol form to be sprayed with airplanes over the cities to calm down the population.” Rumsfeld is responsible of having sold chemical weapons to Saddam Hussein back in the 80's which this dictator used to exterminate the Kurd nation in northern Iraq. It is the same Donald Rumsfeld who approved, when he headed the Food and Drug Administration (FDA), aspartame to be used as a sweetener in food and which now has been termed as a chemical agent that damages human health. Rumsfeld received \$50 million dollars as a bribe to have him approve aspartame known in the market as Nutrasweet®, Canderel® and most recently commercialized under the brand Splenda®. In this 2010, the Pentagon classified aspartame as a chemical weapon in its books. Since then, its name was changed to Aminosweet®.

This is an example of the Washington-political-criminal complicity, the Neocons, who exercise the abuse of power linked to huge profit within the Military Industrial Complex [MIEC] while they gather in secret on part of the World Elite to follow up on its genocidal policies to depopulate the planet.

Rumsfeld's comments make him complicit of a crime. A crime that goes unpunished through total impunity and which no one ever questions at an official level in Mexico, The US and the world for that

matter; *chemtrails* are the perfect medium to start exterminating humanity because it is a slow and soft kill. It is, *de facto*, a “Soft Kill” or a lighter form of assassination as Gary Richard Arnold, Director of SCARE (The Santa Cruz Alert Response Emergency) has recently termed the *chemtrail* warfare. Please watch Anthony J Hilder’s interviewing Gary Richard Arnold titled AirCrap at:

These airplanes are intentionally spraying or *chemming* all cities and towns in Mexico. In Ensenada, they have been seen and documented spraying their deadly plumes starting at the fishing port of Sauzal de Rodriguez to the north of Ensenada, and when reaching the town of Maneadero, to the south, they close their valves to go back and begin spraying once again over the civilian population.

We demand that what is happening at this school be investigated. We demand to know what the Mexican Armed Forces, especially the Mexican Air Force and the CISEN (Center of Investigation for National Security) are doing to urgently address this matter as a matter of priority to the national security of Mexico. We demand that our National Sovereignty be defended and be protected from the enemy at hand.

We would like more people to come forward with more information to share with respect to these *chemtrails* which are clearly and deliberately sprayed over our skies in total violation of the Liberty, Health, Happiness and Privacy that the population of Mexico are entitled to. Once your credentials are cleared or confirmed, we will keep your name under anonymity if so desired.
